DETAILED ACTION

Priority

1. Reference to the parent application should be updated to include the patent number and current status of the parent.

Claim Objections

2. Claims 12-15 are objected to because of the following informalities: the addition of the word "type" to an otherwise definite expression (I.E.: "conveyor apparatus of the type") extends the scope of the expression so as to render it indefinite. *Ex parte Copenhaver*, 109 USPQ 118 (Bd. App. 1955); *Ex parte Attig*, 7 USPQ2d 1092 (Bd. Pat. App. & Inter. 1986); and, *MPEP* § 2173.05(b)(E). Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 6-10 and 12-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka et al (US 6,09,533 B1). See Figures 9(c), 11, & 14. Tanaka et al disclose the claimed invention including the biasing member (39) and a stop member (35b) that inhibits the movement of the pivoting member in a certain direction (Col. 13, lines 31-35).

Conclusion

5. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
